

It looks like what?

ScanAsset Image

is a way for the **Asset Management System** to aid those taking the Asset Inventory

1. Find the right product,
2. Visually inspect the asset for damage.
3. Embed All Document types such as **pdf's**, spreadsheets, etc.

With ScanAsset's ease-of-use and the functionality of ScanAsset, you can keep concise records of where your assets are located, current value, and even embed pictures in your database.

ScanAsset gives you a visual of the product to assist in the inventory!!
