Track'em™

Inventory and Asset Barcode Tracking System

From RVB Systems Group

Rugged and Affordable

Track'em™

RVB Systems Group's **Track'em™** is a Microsoft Access database system that provides all of the tools necessary to manage your company's inventory. It allows you to scan barcodes at any material movement transaction, and print reports showing current inventory levels and locations.

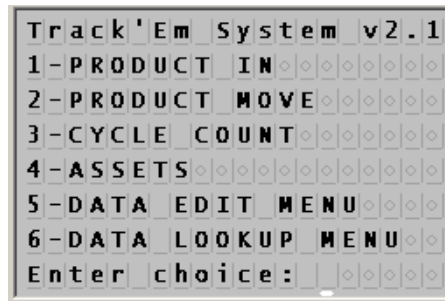

You can also use **Track'em™** to track assets by location and / or any given status (such as person, event, department, etc).

Track'em Main Menu

Unlike some other inventory systems, **Track'em™** is ready to use when it is installed. Anyone can easily customize **Track'em™**, such as the following:

- Enable / Disable password security on specific menu options
- Add / Delete / Change menu descriptions
- Add / Delete / Change users
- Customize report and menu titles with company name and/or message.
- Import / Export data to other databases
- Customize database field descriptions and / or remove un-used data elements
- Easily download asset, item and location descriptions to portable laser scanner.
- Create your own reports using Access or Crystal Reports

Portable scanner main screen

Capture information with the portable scanner, upload it to your PC by clicking a single button in **Track'em™**, and the database is automatically updated with all the data you captured.

Track'em™ Lite includes a rugged CCD scanner that easily connects to your PC via your USB port.

CCD Scanner

Track'em™ Standard includes a rugged portable laser scanner with 8-line display and keyboard.

Track'em™ Deluxe includes portable scanner, plus Bartender barcode labeling software, providing a seamless label printing solution that's easy to use. Prints barcode labels to any printer.

Label Printing Software

Sample **Track'em™** report. Dozens of reports are included. Customize report titles and headers. Or create your own reports using Microsoft Access or Crystal Reports!!

Sample report

- You can download descriptions to the portable scanner so that the operator knows exactly what is being scanned.
- Easily import existing data into **Track'em™**, or add/edit data via the PC screens.
- Simple one button method of importing data from portable barcode scanner.
- Detailed user's manual illustrates all PC and portable scanner screens.
- Runs from local PC or over network.
- Lite and Standard versions include 1000 sequentially numbered barcode labels.
- 30-day money back guarantee and 30-day free software support. Extended support plans available.
